INSTITUTIONAL DISTINCTIVENESS

VISION

Sandipani Academy, located at Shivrinarayan Road, Pendri Masturi, Bilaspur, affiliated to Atal Bihari Vajpayee University, has a sole vision to provide students with an opportunity to develop their personality holistically through academic and non-academic activities. Sandipani Academy, located in Pendri Masturi village, surrounded by rural areas, is very sensitive to social issues. Our organization aims to create an inclusive, innovative and accessible education ecosystem that reaches every learner irrespective of their geographical, socio-economic background or ability and provides them with twenty-first century skills.

PRIORITY

Top priorities for "**EXPANDING EDUCATION SERVICES"** include making education accessible to all, with priority to reach marginalized communities, rural areas, and economically disadvantaged groups. Develop digital infrastructure to ensure reliable internet connectivity, digital devices, and learning platforms for both teachers and students, organize teacher training programs, launch large-scale teacher capacity building programs focused on digital pedagogy and student-centered learning, create a framework for inclusive education framework to develop inclusive strategies for children with disabilities, gender minorities, and linguistic diversity. Monitoring, evaluation, and accountability are important; create strong systems to track student progress, quality of teaching, and institutional effectiveness. Involve local communities and civil society in promoting education at the grassroots level, keeping in mind the importance of community engagement and awareness.

THRUST

Area of Distintiveness: **EXPANSION OF EDUCATION SERVICES**

FREE COACHING

To bridge the urban rural education gap with a focus on reducing inequalities by improving infrastructure and teacher availability in rural areas.We provide free coaching of Pre-B.Ed., Pre-B.Sc., B.Ed/B.A.B.Ed., Pre-B.Sc.(Nursing), PPHT and PAT which are conducted by CG Vyapam for two month.

We have a public library, which is available free of cost for outside Poor students. College has the N-List facility, recording room and English language lab for giving best educational facility to student by developing their skill and making the employable.

CARRIER GUIDENCE FOR CLASS 12TH STUDENTS

Student of class 12th were given a complete tour of the college campus itself. students got acquainted with various department information related to them and its was given the student where explain about the specialities of various departments and guidance was provided by the expert about how much benefits they can get in which field through them in for that carrier that is for provided to the student so power point presentation and kind of doubt. He had was cleared by the expert carrier program. Career guidance program was also nice for B.Ed students in which they were guided by guest speaker.

PLANT GIVING TO NEW JOINING STAFF AND

New member is welcome with a green plant (a new initiative towards environment consciousness) in the presence of all member in the department can't we will be provided by the administrator.

EXPANSION OF DIGITAL EDUCATION

Trainees facilitate effective teaching practice through Power Point presentations, enhance learning experiences and improve communication skills. It is extremely valuable for trainees to organize and present information clearly, combine it with visuals and adapt to diverse teaching styles, ultimately preparing them for their future roles as teachers. E-content is provided to provide accessible and flexible learning to trainees through which the trainee can study through e-content anytime, anywhere. To facilitate learning at individual pace, every trainee can learn according to his understanding and pace so that they can develop better understanding by repeatedly viewing and listening to the material. With visual and audio support, e-content uses video, audio, graphics etc. which makes teaching interesting and effective. This helps in explaining complex subjects in a simple manner.

EXPANSION OF INNOVATIVE LEARNING

The college has taken steps to integrate innovative teaching 21st century skills such as entrepreneurship, digital literacy, collaboration, communication and leadership, which are essential for the modern workforce. The expansion of innovative teaching is transforming education into a more engaging, inclusive and future-focused journey. Through online CPR training programs, trainees are taking this information to students in schools during internships and at the same time, keeping in mind environmental imbalance, trainees have been explained how waste material can be used as useful teaching material, empowering students not only to learn, but also to think, create and lead in a rapidly evolving world.

The college is also leading in the field of entrepreneurship, for which an incubation center has been established in the college which is preparing trainees for tomorrow's career. Which encourages collaboration and global learning.
